ALIMCO Compressor House, Dismantling and Disposal of serviceable materials at KANPUR (UP)

- iii) Reduce the cost for pumping of ground water.
- iii) Provides high quality water, soft and low in minerals.
- iv) Improves the quality of ground water through dilution when recharged to ground water.
- v) Reduces soil erosion in urban areas.
- vi) The roof top rain water harvesting is less expensive.
- vii) Rain Water harvesting system is simple which can be adopted by individuals.
- viii) An ideal solution of water problem in areas having inadequate water resources.
- ix) Reduces the runoff which chokes the storm water drains.

8.6 Method of Rain Water Harvesting:

8.6.1 The method of rain water harvesting are of two types. One by storage of rain water on surface for future use. Second by recharging to ground water.

8.6.2 The storage of rain water on surface is a traditional technique and structures used were underground tanks, ponds, check dams, weirs etc. and recharge to ground water is a new concept of rain water harvesting and name of few of them are recharge pits, trenches, dug wells, hand pumps, recharge wells, recharge shafts, lateral shaft and borewells shaft with borewells etc.
